💼 Projects

19 Months

Smart Scheduling

Smart Scheduling
Internal Interview Scheduling Tool
Developed an internal tool using ReactJS and Java Spring for managing and conducting interviews. Implemented user-friendly dashboards for Admins, Candidates, Schedulers, and Interviewers. Responsibilities included developing and maintaining ReactJS code, adhering to coding standards, and managing deployment through Azure DevOps and GitHub

20 Months

WSO2 API Manager

WSO2 API Manager 3.2.0
Open Source API Management Software
Customized the UI of WSO2 API Manager 3.2.0 using ReactJS to enhance user experience and add new functionalities. Managed deployment on a Linux Azure server, updated to the latest releases, and conducted sanity and regression testing.

6 Months

Innovation Dashboard

Innovation Dashboard
Idea Tracking and Implementation Status
Developed a ReactJS-based dashboard to track new ideas and their implementation status, featuring a Kanban board, status charts, and idea inputs. Utilized Strapi headless CMS for backend management and deployed the solution on an Azure server. Responsibilities included designing and building the UI with ReactJS, managing state with Redux, and handling backend creation and updates in Strapi CMS.
